

Matt Cuthbert from the Busselton Community Garden with the National Climate Relay torch.

Relay out to halt climate change

A SOLAR-powered torch with a wind turbine and a lemon battery made a special appearance at the Busselton Community Garden on Monday.

The National Climate Torch Relay came to town in a blaze of glory

and in an effort to avert climate change.

The GetUp Climate Torch Relay is on tour across Australia on its way to Parliament House in Canberra on October 12.

Busselton organiser Matt Cuth-

bert said the relay was a chance to showcase the achievements of the Busselton Community Garden in contributing to the fight against climate change by producing food locally and promoting wise water and energy use and production, recycling and revegetation.
